
Rolling Mill Strike.
LANCASTER, Pa., Aug. 6.—The employ-
of the Susquehanna rolling mill, the Colum-
bia rolling mill and the Columbia Iron Com-
pany, of this city, are on a strike for an in-
crease of wages to the Philadelphia base.
About 400 operators are affected. Negotia-
tions are in progress for a settlement.

DUBLIN, Aug. 6.—Londonberry, the vicarery of Ireland, and Sir Michael Hill Beach, the new chief secretary, were sworn in at Dublin Castle.

Another Riot Feared.

BELFAST, Aug. 6.—Menacing mobs are assembling in the streets here, and a renewal of the riotous scene is feared.

This morning they had hot words, ending in both drawing revolvers. Totman fell dead at the second shot, but he had first lodged three balls in the body of his opponent, who lies in a dying condition. Both men have relatives in this city. Totman was wealthy and owned four farms. Another version is that Totman first shot Briggs and suicide

COMMUNICATED.

CHRISTIAN DUTY.

Editor Bulletin: Our usually docile and amiable street statues who stand on the street corners, criticizing and condemning the communication your paper published on the labor question of a recent date, should be sure the author is not present while they are doing so. Why, one would have thought they had swallowed a clothes-pin, a meat ax or a painful of blue vitriol or some such! Therefore, do they lose their sweet spruce-stem temper and fly into such a fit of violent wrath, and accuse us of the terrible crime of copying the articles from some book or paper? We do not claim to furnish all the brains there are floating around loose; and when they see anything in the columns of this paper, signed "L," that in their exalted estimation would please them, make them laugh and grow fat, read it, criticize it and we will prompt not to turn ourselves inside out or jerk ourselves into a double-barreled connotation fit, if they do inadvertently neglect to give us credit for it.

But to our subject. Christianity should take a hand in the labor agitation that is going on in the land. Christ and his personal disciples were from the lower, common walks of life, and consequently associated with that class. Each one of his chosen twelve came from the laboring class, about one-half of them being fishermen. Paul himself, though well educated, was a tent-maker by trade. Such was the class from which the Savior selected his trusted disciples to work in his vineyard and spread the gospel among all the people. If on earth to-day, there is little doubt where the sympathies of Christ and his disciples would be enlisted. Their followers, if true, would not walk in the same direction. He who overthrew the tables of the money-changers would never endorse any arbitrary and starting policy of the avaricious mill-owners and soulless corporations. Christian men and women should give their support to the laboring classes in all their struggles for right. Christian civilization should grapple with and solve the great question of Labor and Capital. Followers of Christ are not doing their duty when they remain idle and listless, and permit the wrongs towards laboring men and women to exist. A passive attitude in the continuation of wrong is not a virtue, and falls little short of being a vice. If Christianity is to master the world it must give law to trade, and see that a proper balance is placed between labor and capital. The church seldom punishes the vice of avarice, but it should never hesitate a moment when the comfort and happiness of a whole class of fellow creatures are involved. Christian men and women should promptly and enthusiastically array themselves on the side of justice and right in this struggle of labor to free itself; they should perform their whole duty in this crisis. Are they quite sure they are doing so now? "L."

Southern Exposition.

(Correspondence DAILY BULLETIN.)

The Southern Exposition at Louisville opens August 28. Every one seems to be taking a greater interest in this exposition than ever before. The exhibitors are already at work preparing their exhibits, which this year are to be especially novel and attractive. One of the most pleasing and instructive will be a Japanese village, which will be situated in the Machinery Hall of last year, in the southern part of the building.

A tank which had been used for exhibits of pumping machinery will be converted into a clear, beautiful lake, across which will be stretched a rustic bridge. On the mossy banks around the lake the huts will be built in true Japanese style. The fences and walls will be made of bamboo, roofs thatched, and tiled and decorated in a national manner. The village will be peopled with natives, and their peculiar methods of cooking, eating, and manufacturing artistic articles, with which all of us are familiar, will be shown every day.

The Art Gallery, this year, will be situated in the main building. All the spaces are filled, except one portion, devoted to paintings by natives, and it is filling rapidly. The first car-load of paintings arrived to-day. The carpenters will not be out of the Art Gallery until August 8, and after that the hanging of pictures will begin.

The music at the exposition has become the chief attraction to Louisville people. Damrosch's Orchestra has been engaged for the first four weeks, and Cappa's Military Band for the last four. The season tickets are only \$8. Think of it! Ninety-six concerts for that sum of money. No other exposition in the country has ever attempted such a thing.

Let me, good music performed by the best of musicians at such a price. The Music Hall will be an agreeable surprise to those who visit the exposition this fall. It is very much improved by the changes made in it for the Opera Festival last year.

The opera chairs will be much more comfortable than the hard, wooden benches with which the Music Hall was seated last year. The acoustic properties of the hall are very fine. One may sit in the rear seats in the hall and still hear distinctly every note of music played by the orchestra.

Come down for the opening. Louisville is expected to be thronged at day. As yet the programme has not been made out, but great preparations are going on. Invitations have been extended to Senator Sherman and Speaker John G. Carlisle to deliver addresses at the exposition on the opening day, but as yet they have not formally responded. Already notices had at the main office of the exposition of a number of excursions on that day, and crowds will be here.

ALTA.

The Mainfold Uses of Luminous Concrete—Gates and Beacons.

A method of utilizing the luminous powder prepared mainly as a sulphide of calcium for admixture with cement, plaster of Paris and concrete has been recently invented by a couple of London men, the object being to prepare the articles with a self-contained phosphorescent property instead of coating them with luminous paint. As an example, the patentees take of cement, such as is known as Keen's Portland or other suitable make, in varying proportions, as, for instance, two pounds to five pounds to one pound of the luminous powder; mix the same with water, and then mould it to required shape in the usual way, or lay it out on ceilings or walls by means of a trowel.

The patentees attach importance to placing the moulded articles, as soon as they have been dried, in a box of paraffine wax and benzoline or other suitable weather or water proofing substance. In the case of using the luminous cement upon a wall or ceiling, they suggest or brush the surface over with a solution of paraffine wax and benzoline or other suitable damp-proofing solution. The uses of a luminous cement are manifold: For the garden—luminous concrete as edging to garden paths and carriage drives, for guides and beacons at the entrance gates of drives, inside of stables, the base of balustrades, or the entirety of balustrades. For roads—as luminous beacons at corners of dark country lanes, and at the ends of bridges, ends of walls and curbs of footpaths. For docks—for edging of piers and wharves. For water-works—for the safety and dispatch of night work by the erection of luminous guides and beacons and for fire plug notices in walls. In short, for any places where the light of day will sufficiently excite the phosphorescent property as to render the cement or concrete work luminous by night.—Scientific American.

The Prussian, English and Russians.

The whole character of the Prussian is above all governmental. In this line our strength—as well as the reason that we Prussians and the north Germans generally, who are influenced by us, are rarely attractive to others. In the English and in the Russian this governmental stamp is less predominant. The English are, notwithstanding their peculiar manners and customs, the freest nation in the world. Their social laws tend to lay down firm but convenient laws for human intercourse. A man's position in society depends upon the judgment of society only, and the government of the country and the idea of a "gentleman" is the measure by which the English measure a man. It is otherwise with the Russian. He has no idea of gentility. But there is a small part of Russian society which is as free from the influence of the government as the English themselves, and where the social laws are also self-imposed. Of Russian society in general it must be said that it bears neither the governmental stamp of Prussia nor hardly a trace of the English society; it is a loose, shapeless mass, which, however, by individual amiability, is astonishingly attractive. But the one thing which is peculiar to the Prussians—namely, the governmental character of society—can be found neither among the English nor the Russians. If we want to be anything in society we must be soldiers or officials, otherwise we are nothing.—German Newspaper.

CHICAGO TAXES.

Millions of Dollars Worth of Property Escaping Taxation.

CHICAGO, Aug. 6.—The Cook county board of supervisors has held a meeting, at which a sweeping increase was resolved upon in the matter of city assessments. Mr. Van Pelt said the assessments year after year were becoming more outrageously unequal, the property of the poorer people being taxed to the full legal limit, while that of the rich was in some cases only taxed one-tenth of the proper amount.

In the southern division of the city, he said, there was property worth \$500,000,000 which was escaping taxation, and he knew of a man who had \$2,000,000 in bonds who had not paid a cent. He offered also a resolution which was adopted, setting aside the assessments handed in by the assessors, and increasing the assessments as follows: South Chicago, \$50,000,000; West Chicago, \$20,000,000; North Chicago, \$10,000,000. Assessor Hall, of West Chicago, says the board has no authority to take this action. The board also increased the assessments on suburban property in Cook county by \$10,000,000, making a total increase of \$15,000,000.

Saratoga Races.

Fourth race, purse \$500, all ages, one and one-quarter miles: Mollie McCarthy's Last first, Jim Douglas second, Monogram third. Time 2:13. Mutuals paid \$24.40.

Red River Rising.

GARNERSVILLE, Tex., Aug. 6.—The Red river has risen twenty feet since yesterday afternoon. The rise swept away and destroyed all the work that had been done on the Santa Fe railway bridge. An immense trestle work that had been built across the river for use until the bridge should be completed was carried away. One of the boats, containing an engine, was lost, and a spike driver and engine were carried down the stream and sunk. It will be several weeks before work on the bridge can be resumed. The river is higher than ever known before.

Insane Man Jumps to Death.

LEMA, O., Aug. 6.—John Merrill, insane, jumped from a Chicago & Atlantic train last night, and was dashed to death. His home is in Jamestown, N. Y. He was on his way home from Lansing, Iowa, accompanied by his wife and daughter.

A Lawyer and Author Suicides.

NATCHEZ, Miss., Aug. 6.—Judge Joseph Shields, a prominent member of the bar, and author of the "Life and Times of S. S. Francis," committed suicide by strangulation. The loss to his wife some months ago had affected his mind.

The state convention of the Greenback Labor party of Indiana will meet at Indianapolis to-day. The committee on resolutions is in favor of prohibition, or at least of submitting a constitutional amendment to that effect to the people.

A Question

Often asked, but seldom answered satisfactorily: "Is there a remedy known to the medical profession that will ally the suffering patient to women who are subject to dysmenorrhea and its attendant discomforts?"

Ladies
If you have not tried it, do so AT ONCE. There is relief for you; it has been found in

Tongaline

Read what an eminent physician has to say upon the subject:
"I have derived particularly gratifying results from the use of Tongaline in cases of dysmenorrhea. In the case of a lady of chronic condition, and a chronic sufferer from this disease, who had been driven almost to the verge of insanity by the severely suffering, its action has been most satisfactory. It relieved her promptly, and she now passes the once dreaded periods with but little discomfort. I could mention other instances of a similar character, but this is a remarkable case."

CITY COUNCIL.

Monthly Report of Officers—Claims Allowed—Permits Granted—Other Business Transacted.

President J. P. Philier rapped the City Council to order promptly at 8 o'clock last evening. A call of the roll found only three members absent—Messrs. Hechinger, Yancy and Hendrixson. Mr. Yancy afterwards came in.

Minutes of last meeting were disposed of in usual manner. Report of the various city officers were filed and approved. Mayor Pearce reported fines to the amount of \$1,069 assessed during past month, of which \$83 had been paid to City Marshal, \$165 reported, \$46 worked out, \$758 being worked out, and \$17 escaped.

City Marshal reported \$115 as amount of fines and old bonds collected. The warrant for the month was reported at \$247 by Wharminster Philier. Treasurer C. S. Leach was sick and unable to make his monthly report.

Claims and accounts to the amount of \$1,075.21 were allowed and ordered paid.

The petition of J. Hamilton, agent, for permit to erect office at coal scales on east side of commerce street, north of Second, in Fifth ward, was taken up. It has been pending for several months and has caused considerable feeling. Permission to erect scales was first granted, but after their erection no convenient place for an office could be found, and a permit to place a small office over scales was asked for. Remonstrances were sent in and the question has been a bother ever since. Remonstrances were again sent in last evening from parties residing in adjacent property that the office would be a nuisance and obscure the view. Other objections were made, and the question was discussed pro and con for some time. Permit was finally granted by a vote of eight to three.

Payment on Fleming pipe was reported completed, but collections were not all made. Further time was given committee.

The contract for furnishing a hose-reef for Amazon Fire Company was awarded to Owens & Barkley at \$150, real to be of Ramsey & Co.'s make, and delivered in this city. Owens, Mitchell & Co.'s bid was on same reel at same figures, but to be delivered at Cincinnati. The only difference in the two bids was the freight from Cincinnati to this city.

Improvements on gutter on south side of Second street—Germanstown pipe—are being made, and will be completed this week at a cost of about \$150.

The oft-mentioned question as to ferry ordinance was continued, the committee having taken no action.

The question as to making arrangements with Street Railroad Company for keeping Germanstown pipe in repair was stricken from minutes.

Further time was given committee to confer with Colonel Baldwin and others as to purchase of that part of Germanstown pipe within city limits.

Fitting up of additional rooms in High School building is in progress. The improvement will be a handsome one.

The question of building a sewer along Market street to High School building was discussed at some length. The cost was estimated at from \$800 to \$1,000. The matter was referred to committee to prepare specifications and receive bids for said work, and also bids for tapping old sanitary sewer, and report to council.

Permits were granted as follows: Geo. Beasley, frame stable on Sutton street above Fourth; T. T. Emmons, frame stable on rear of lot in Fifth ward, between Second and Front; Elizabeth Haney, frame addition to residence on Fourth street, Fifth ward; O. C. Mitchell, to put drain pipe from cellar of house on Bridge street to sewer; John H. Madox, one-story work shop on lot, corner of Commerce and Front streets.

On petition, Committee on Internal Improvement was ordered to grade and pave Strawberry alley from Third to Fourth streets, between Limestone and Plymouth.

The matter of hiring prisoners in the jail to contractors on railroad was referred to Committee on Police and City Marshal with power to act.

Committee was instructed to put in additional ring-bolts on the grade between Market and Limestone streets.

The attention of the council was called to the fact that Wm. Wormald had been occupying part of city landing since the surrender of his lease. The Wharminster was instructed to collect rent from Mr. Wormald for said time.

Notice was ordered to be given to the Mayville and Big Sandy Railroad Company to make the necessary changes in water mains at Commerce and Third streets, caused by the grading of said road.

The Marshal was instructed to have a previous order of the Council enforced as to repairing pavement on east side of Sutton street, between Front and Second. Deputy Marshal Dawson was granted leave of absence to attend Ruggles Camp Meeting, on condition he furnished a substitute.

The attention of Council was called to

the occupants of "Owens Row." The place had become a nuisance, it was said, and was causing the police more trouble than all the rest of the city. It was injuring other property in that vicinity. Marshal Hefflin said it was becoming unhealthful for ladies to pass there of evenings without escorts. Vile language could be heard at most any hour from its occupants. The police were instructed to rigidly enforce the ordinance against such offenses. [The whole matter will likely be placed before the next grand jury.]

W. S. Frank, President of Board of Education, filed his annual report. After some other matters of minor importance were disposed of, Council adjourned.

THE COMING FAIR.

Entries for the Races all in, and a Fine Lot of Trotters Will be on Hand—Encouraging Outlook.

These contractors are making good progress on the railroad bridge across Limestone Creek. The derricks were completed last evening, the engine is in position and the work of driving the piles upon which the foundation is to be laid will be commenced to-day. The piles will be sunk to the depth of forty feet, at least. If a good foundation be not obtained at that depth, piles sixty feet in length and about 200 in number will be used. They are of oak and very heavy. Upon these piles other oak timbers will be laid, and the stone work will then follow. It will require from 700 to 1,000 car-loads of stone to complete the structure. Several car-loads have already been received. The stone is as fine as can be had anywhere, and is being furnished from the quarries in Rowan County. A large shipment of cement has also been received, and about everything is now in readiness to push the work to an early completion.
